LIFE SCIENCES (Mike Alder, malder@byu.edu)
1. 2017-050: Preterm Delivery Biomarkers on a Micro Diagnostic Device – Adam Woolley/Greg Nordin/Steven Graves
2. 2017-027: Analogs of Englerin A for Renal Cancer Treatment – Merritt Andrus
4. 2017-019: Treatment for Inflammation or Obesity – Laura Bridgewater
5. 2017-018: Potential ALS Therapy – Juli Grose
7. 2016-054: Pancreatic Cancer Diagnostic and Therapy – John Price
8. 2016-053: Biosensor for Specific Endocrine Disrupters – Brad Bundy
10. 2016-021: Bortadella (Coriza) Turkey Vaccine – Marcus Jensen
12. 2015-078: HIV Vaccine – Brad Berges
15. 2014-098: Biomarker for Addiction – Scott Steffensen
17. 2012-037: Neurodegenerative Disease Diagnostic – Bruce Brown (License Pending)

SOFTWARE (Dave Brown, dave_brown@byu.edu)
1. 2017-062: Information Content Auto-Focus – Matt Linford
2. 2017-054: Page Image Segmentation and In-place Character Recognition – Bill Barrett
5. 2015-013: Tileable, Coplanar, Flat-Panel Holography Display and Haptic Interface – Daniel Smalley

ENGINEERING (Spencer Rogers, srogers@byu.edu)
1. 2017-040: Organ Pedal Extension – Don Cook
2. 2017-037, 2017-032: Innovations for Sag Prevention, Shape Conformance, and Wicking – Spencer Magleby
3. 2017-024, 2013-083: Sensors for Medical Applications – Brian Iverson
5. 2016-046: HD DVD Based Fluorescent Scanning Thermal Microscope (FSTM) – Troy Munro
6. 2016-045, 2016-037: Origami-Inspired Portable Collapsible Ballistic Barrier – Howell
7. 2016-038: Method for Controlling the Structure of Crystalline Materials – Oliver Johnson
12. 2012-004: Biological Tissue as a Strain Measurement Device – Anton Bowden
18. 2000-28: Near Constant Force Electrical Contact – Larry Howell
WORKING WITH BYU TECHNOLOGY TRANSFER

Why Work with BYU Technology Transfer

1. Secure rights to vetted technologies (many of which are leading edge)
2. Immediately create a barrier to entry and establish a unique competitive advantage
3. Acquire rights with minimal cash (we will often take equity in lieu of upfront license fees)
4. Gain access to, and mentoring from, seasoned professionals and commercialization experts

Why Professors Commercialize

1. Give the public access to BYU inventions
2. Gain access to industry resources through research funding and strategic collaboration
3. Generate supplementary personal income (inventors receive up to 45% of licensing revenue received by BYU)

What We Do

1. Protect BYU faculty-led inventions, primarily through patents
2. Commercialize BYU faculty-led inventions through sale or license
3. Support BYU faculty-led research by introducing potential research sponsors

THE BYU TECHNOLOGY TRANSFER LICENSING PROCESS

To get details on all our available technologies, visit our website (techtransfer.byu.edu) or contact a member of our staff by calling 801-422-6266. You may also email us directly as follows:

- **Life Sciences**: Mike Alder (malder@byu.edu)
- **Software**: Dave Brown (dave_brown@byu.edu)
- **Engineering**: Spencer Rogers (srogers@byu.edu)

When you are serious about licensing one of our technologies, we will arrange a meeting with the inventors so you can evaluate the opportunity. Typically, these visits will occur over the phone or at BYU.

We seek to match the right licensee with the right technology. First-time entrepreneurs may be required to include a seasoned entrepreneur on their team. When a licensing match is found, we formalize it with the following:

**OPTION**

Before licensing, you may want to enter into an exclusive option to permit further research and investigation. The length and other terms of such an option are negotiable. During the option period, BYU owns the technology but you have exclusive rights to negotiate a license or assignment.

**TERM SHEET**

Once terms have been negotiated and agreed to, BYU will draft a non-binding, time-sensitive term sheet for your review.

**LICENSE/ASSIGNMENT**

Once the term sheet has been reviewed and the parties have agreed, BYU will draft a complete license or assignment for your review and signature.

- **License**: BYU owns the technology but you have rights to commercialize or sublicense.
- **Sale / Assignment**: You own the technology and have all rights
